SUMMARY

A computer engineering graduate from Batangas State University, eager to apply and expand my technical skills in a professional setting. I am an enthusiastic, flexible and hard-working, seeking opportunities to gain valuable experience and contribute meaningfully in a real-world work environment.

WORK EXPERIENCE

WORK IMMERSION – CREOTEC PHIL. INC

January 2019

- Learned the importance of quality control and work ethics
- Work in PCB manufacturing, including component installation, functionality testing and inspection
- Designed and implemented a functional circuit that automatically illuminates in low-light conditions

OJT – Institute of Computer Engineers of the Philippines (ICpEP - Singapore)

Feb – May 2023

- Gained introductory knowledge in Cloud Services (AWS), Virtual Machines, WordPress and Cybersecurity
- Set up a virtual machine using VirtualBox and deployed a web server on AWS using Cloud Formation
- Developed a blog website hosted on AWS with WordPress

Integrated Computer Systems, Inc. (ICS)

December - May

Technical Support Engineer

- ICS Service Center
 - Managed various laptop brands (HP, Dell, MacBook, Lenovo), performing basic troubleshooting, diagnostics, maintenance and testing for devices (laptops, desktop, accessories).
 - Gained experience in formatting, Microsoft Autopilot and provisioning of units.
 - Handled service tickets, work orders and delivery/pickup coordination with customers.
- Wells Fargo One and Five/Neo
 - Asset/inventory management and customer support
 - Managed the storage, tracking and organization of laptops and computer accessories.
 - Utilization of bar code scanners to record and update serial numbers for assets.
- ByteDance
 - Maintenance and checking of organizations technical equipment
 - Providing customer supports to the end users like handling inquiries and resolving issues related to inventory and product availability.

WEBINARS

- Introduction to VMware Virtualization
- Introduction to UI/UX Design and Basic Web Development
- Ethical Hacking Fundamentals
- Introduction to Web3

EDUCATION

- Elementary Education – Muzon Elementary School
- HS and SHS Education – Sta. Teresa College (STEM)
- College Education – Batangas State University (BS Computer Engineering)
 - Thesis: Developed a device for detecting counterfeit medicines

SKILLS

Office and Document Tools

- Microsoft Word, Excel, PowerPoint, Autotask

Technical Skills

- Basic Python programming
- Web Development: HTML, CSS, JavaScript
- Experience with Django, Sqlite, React.js
- Experience with Machine Learning, Data Modeling & Analysis
- Problem solving and troubleshooting skills
- Ticketing/Work Order (Autotask), microsoft autopilot, barcode scanners
- Providing technical support to customers
